

ABSTRACT

Washington State Hay Growers Association

Gary R. Buckner
Area Manager
WA State Dept. of Ag (WSDA)
Pesticide Management Division

TITLE: What, When & Where Can I Spray?

When WSDA conducts an inspection or investigation and consequently discovers violations, we have found that many of them are the result of not knowing something about what, when or where to spray. So before your next application you may want to ask yourself the following questions:

- ✓ Is the product I am going to use registered federally and in the state?
- ✓ Is the product properly labeled?
- ✓ Is the site I want to apply to on the label?
- ✓ Is this product restricted in any way that I need to be concerned about?
- ✓ Are the environmental conditions right?
- ✓ Are there any cutoff restrictions I need to be aware of?
- ✓ What county area am I in and are there any restrictions there?
- ✓ Are there any sensitive crops or places next to the area I am going to spray?
- ✓ Should I notify any neighbors?

If you should have any questions we encourage you to call your nearest WSDA office and ask for assistance. 1-877-301-4555
