

NOAA Weather-At the touch of a Button

Dennis Hull, Warning Coordination Meteorologist
NOAA National Weather Service Pendleton, Oregon dennis.hull@noaa.gov

“Weather at the touch of a button”. Only a few years ago, that was just a dream...now it's a reality. If you need last week's weather, current weather, or the forecast for next hour, tomorrow, next week, or next month, there are many locations on the internet for that information.

Here are some sites (URL address current as of 1/3/07):

Past weather:

Western Regional Climate Center

<http://www.wrcc.dri.edu/>

NOAA-National Weather Service

Weather.gov/Pendleton

(click on Climate-Local, then click NOWData)

University of Utah-MesoWest

<http://www.met.utah.edu/mesowest/>

Current weather:

NOAA-National Weather Service

Weather.gov/Pendleton

(click on Current Conditions-Observations, Satellite, or Radar)

University of Utah-MesoWest

<http://www.met.utah.edu/mesowest/>

Forecast Weather (1 hour to 7 days):

NOAA-National Weather Service

Weather.gov/Pendleton

(click on Forecast-Public, Fire Weather, or Sunshine Prob)

(click on Prototype-Digital and enter your location)

Forecast Weather (6 hours to 16 days)

GFS 16 day plots

http://wxweb.meteostar.com/sample/NWR_map.shtml

(select location from map)

Weather Outlooks (6-10 day to 12 months)

<http://www.cpc.noaa.gov/>

(select desired outlook from menu)
